*No. 5 is united to No. 4.

DISTRICT NO. 1.—1ST GRADE.

This school of 31 weeks, was divided into three terms. It has been a very profitable school, well conducted, and thoroughly instructed. The scholars exhibit more improvement, in every respect, than ever before; proving, in my opinion, the advantage of employing good teachers keeping them as long as possible in the same school.

DISTRICT NO. 1—2d GRADE.

This school of thirty-one weeks was also divided into three terms. The same teacher has been employed in this grade for a number of years; and, like the first grade, has been faithfully and thoroughly managed. The scholars have made wonderful improvement in their studies and deportment.

DISTRICT NO. 1—3d GRADE.

This school of twenty-nine weeks, was also divided into three terms. This teacher having taught this grade for some time, managed her school of fifty-seven little children remarkably well, maintaining good order and learning them much.

DISTRICT NO. 2.

This school had two terms of seven weeks each, employing the same teacher for both. She performed her duties faithfully. The scholars were well managed and exhibited good progress.

DISTRICT NO. 3.

I did not visit this school in the summer as I had no notice of the beginning or close of the term. The teacher was well qualified and sent me a good report.

The winter term was a profitable one, excellently managed and instructed. The scholars made good proficiency in studies and deportment.

DISTRICT NO. 4.

This District has a new School House. District No. 5 has been united with it, and they have had their first term this winter. The teacher was well qualified and faithful in her duties. There was good improvement.

DISTRICT NO. 6.

This District is a Union School with New Hampton and Centre Harbor. Our town has but a few scholars here; they have been well instructed, and have made as much improvement as could be expected, for two terms of six weeks, with a new teacher for each term.

REMARKS.

There is too little interest manifested by the people of Ashland in our schools; very few visiting, or showing in any way, that they feel any responsibility in relation to the education of their children. There are no Maps, Charts, Globes, or even good Black-boards, provided, while the School Houses are unfit in every respect. There is no proper ventilation in any of them; they are unhealthy and nothing about them contributes to comfort, or invites to study. There are no ornaments in the school-rooms of pictures or flowers, or even well painted walls. There are no shade trees or shrubs, or proper play-grounds around them.

All these things are necessary to give our children a chance for a good education. Every child surrounded by the beautiful and useful things of this world, is more likely to grow up an improved specimen of mankind, than those unaccustomed to them. When our citizens come to regard these things, and will aid the teacher in the management of the children, sending them always to school, and at the proper time, we may have, with all our present advantages, a well educated class of young men and women.

JOHN A. DANA,
Superintending School Committee.
